STEVE JOBS RESIGNS FOR HEALTH REASONS

August 25, 2011

Recent picture of Steve Jobs from CNN. This seems to have been from WWDC in June.

“Art Photo” from the Tribune - compare with the CNN phot to see how his illness has affected him.

As I predicted yesterday the Steve Jobs resignation (disability?) is all over my usual sources and no doubt others.

Just click on a link. They are all “trusted” websites. Also, I might hasten to add that there are a lot more of them than I copied “weblocs” for. I am not enough of a computer person to be able to explain it and I don’t want to eliminate possibly interesting links. This is because they are links to ‘follow on’ stories. Some of them seem to be functional duplicates. This stems from my philosophy of the news: I want to know of events as they happen and I truly feel that there is value in seeing the news develop over time. I really love the “raw feed”, so that is what I aim to provide.

So, here are the links:
